

Expand SAP systems in a way that makes sense – time recording for SAP®SuccessFactors Employee Central

jay cloud enables the organization and administration of physical access rights directly from the SAP system. A subsystem is no longer required for access control, time management and device management.

jay cloud makes it easy to manage these important and sensitive corporate tasks with a high degree of security - directly from SAP®SuccessFactors Employee Central.

jay cloud combines the strengths of the two leading providers of ERP software and access and security solutions: **SAP and dormakaba**.

jay cloud paves the way for our customers towards digital transformation.

jay cloud time

is a “Software as a Service” application for time recording. It is directly integrated with SAP SuccessFactors Employee Central

jay cloud time

is a global, central solution for all industries, ideal for medium-sized and large companies

100% Cloud

based on SAP Cloud Platform

Built on SAP Cloud Platform
Co-Innovated with SAP®

Time recording with jay cloud time

With **jay cloud time**, working time can be recorded accurately and flexibly - the collected data is forwarded to SAP®SuccessFactors Employee Central Time Sheet.

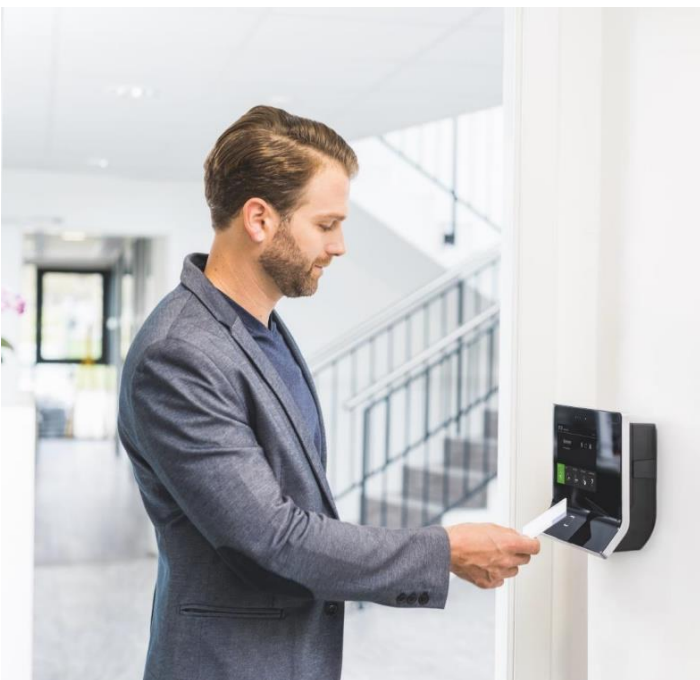

Working hours and activities are recorded no matter where they occur - on the road or in the office, at the time recording terminal, with the smartphone, in the browser or automatically, when a door is opened.

A professional time recording system provides comprehensive transparency around working hours and thus happier employees.

jay cloud time creates a solid platform for efficient time management. You always have an overview of working time balances, absences and overtime. Jay cloud time will help you to streamline the time management process to increase efficiency and to reduce labor costs.

jay cloud time – benefits at a glance

- Time recording - efficient, compliant and always up to date
- Platform for exact and error-free payroll accounting
- Seamless working time management
- Fully integrated with SAP SuccessFactors Employee Central
- Implements existing SuccessFactors Employee Central time rules
- Unified user experience
- Designed with your business workflows in mind

Benefits for your colleagues

Employee

- Simple and intuitive user experience.
- Minimize exceptions in their time keeping data.
- Higher satisfaction through more transparency in working hours.

HR Manager / HR Administrator

- Greater efficiency and less administrative effort in time recording and monitoring.
- Less administrative effort through automation.
- Depp insights into working hours

Application Overview

jay cloud time – terminal-based time recording

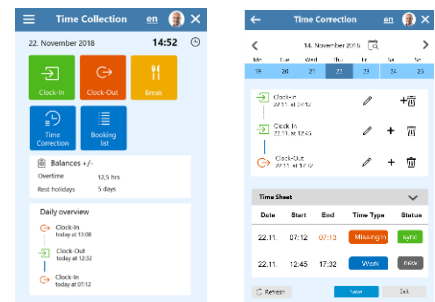

- Efficient time recording with low administration costs
- Avoidance of incorrect entries
- Offline capability - no data loss
- Data collection via biometrics and / or RFID
- Integration and secure communication of terminals by using the SAP Leonardo IoT Platform

Terminal functions:

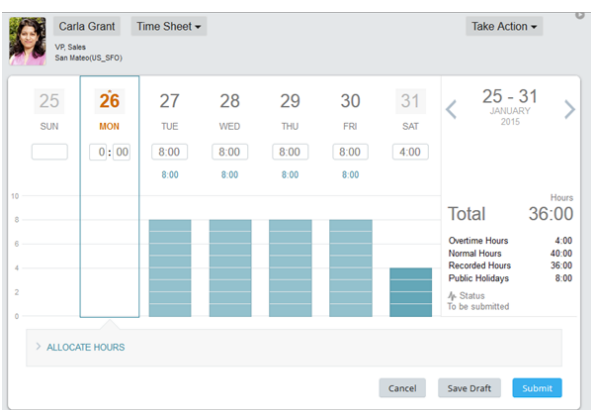

- Clock-in with reason
- Clock-out with reason
- Break start - end
- Query balances
- Recorded time correction
- View time sheet

jay cloud time - mobile and browser-based time recording

- Start of the application directly from the SuccessFactors Launchpad
- Only one single authentication for SuccessFactors and jay cloud (Single Sign On)
Time bookings and all terminal functions available
- User friendly interface - easy to operate
- In planning: native apps for iPhone and Android
- support for Apple Watch

jay cloud time – time pairing and integration with SuccessFactors EC Time Sheet

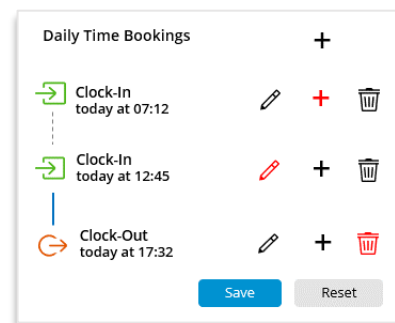

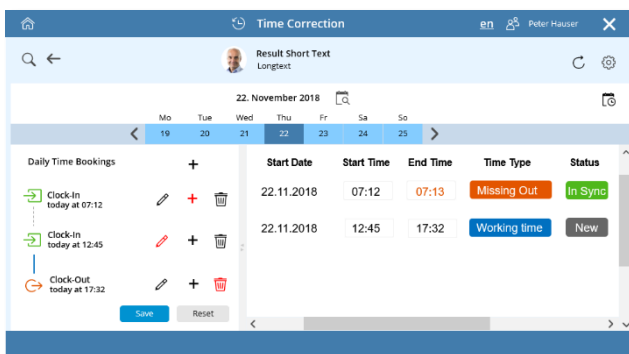

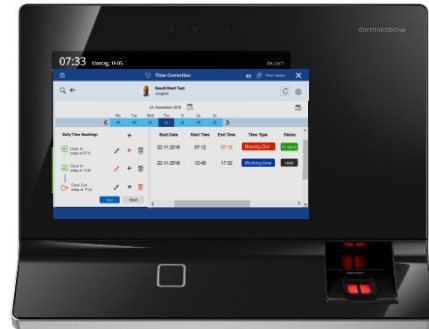

- Time pairing based on collected time events
- Realtime calculation and immediate transfer to SuccessFactors EC Time Sheet
- Instant recalculation of time pairs in the case of anomalies or time corrections
- Automatic clock-out
- Blocking of double bookings
- Handles overnight bookings

In planning:

- Checking against employees' work schedule
- Time notification alerting – sending notifications to the time keeper in case of deviations (clocking in early for shift or leaving late, missing clock-in/clock-out punches).
- Time clock rounding rules
- Employees with multiple employments are supported
- Single source of truth - time profiles, time types and time recording rules are defined in SF EC and synchronized with jay cloud
- Time recording for external employees such as contingent worker

jay cloud time – corrections

- Manually create, modify or delete time punches
- Configurable time limit for time corrections (for example a maximum of 3 months)
- In planning: send notifications to the HR manager / time keeper, incl. approval workflow

jay cloud time – attendance board

- Quickly show “who is on-site - who is out of office?”
- Easy to use report for front office personnel
- Available via mobile, tablet and browser
- Including SF EC absences such as vacation
- Including access control transactions if required

jay cloud time – balances / time report

- Display balances and time accounts per employee
- Real time visibility - balances are always up to date
- Booking viewer application to display time clock punches and time sheet entries

Jay cloud time – media management

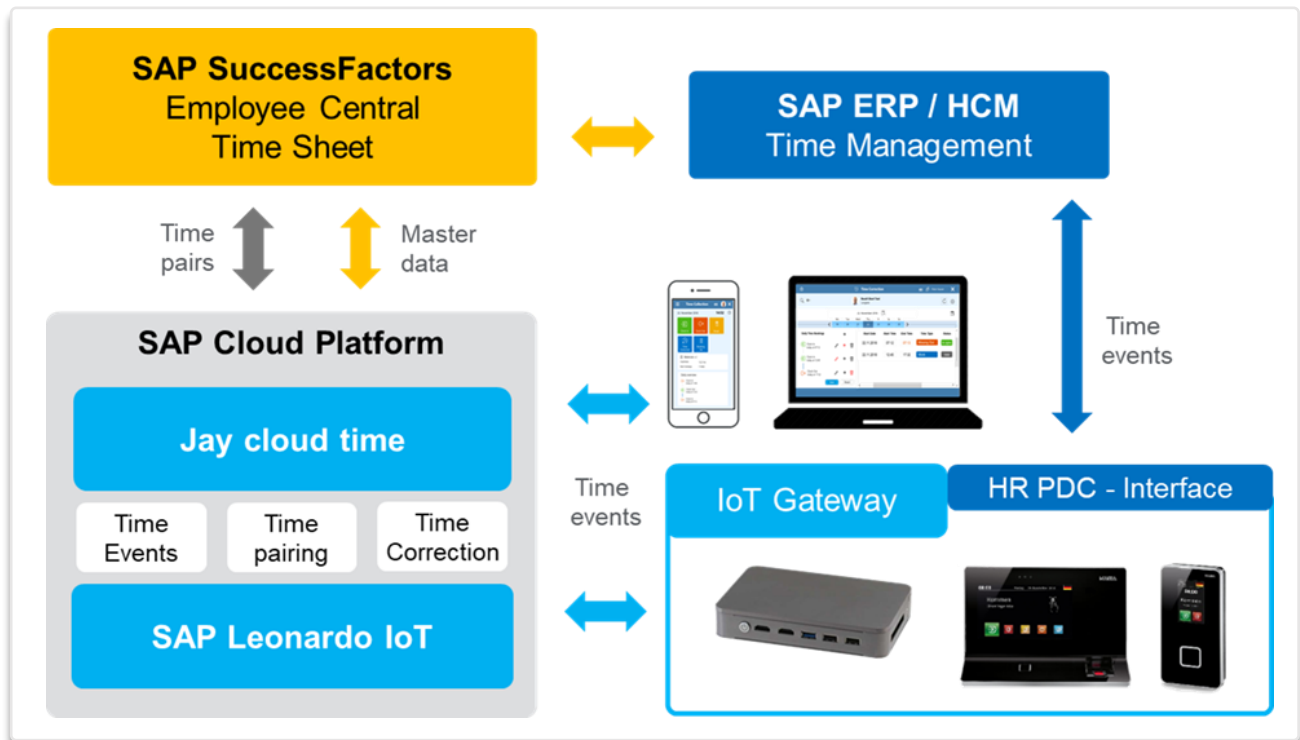

- Comfortable and secure management of access media.
- Including card production and printing
- Support for all types of credentials such as RFID, mobile credentials, smart keys.

Jay cloud time – integration services

- Integration with SAP ERP HCM
 - o Download master records and balances
 - o Upload time punches
 - o Certified HR-PDC Interface
- Integration with Third-Party TMS systems
- Import / export via Excel
- Integration with **jay cloud access control**
- Integration with TDS Visitor Management System and Life-Safety System
- In planning: connection to other systems such as SAP Cloud for Real Estate, Visitor Management Systems and others

jay cloud time - technical system landscape

- **jay cloud time** is a 100%-cloud application, based on the SAP Cloud Platform
- providing a comprehensive service concept for remote maintenance and monitoring of the system

Data flow - SAP SuccessFactors EC - SAP Cloud Platform - jay cloud time - devices
