

Integration of access control and time recording in SAP®SuccessFactors

With **jay cloud**, companies can easily organize and administer the entire time management and access control system within their SAP system. No need for a third-party system anymore.

jay cloud allows to manage these important and sensitive corporate tasks with a high degree of security - directly from SAP SuccessFactors Employee Central.

jay cloud thus combines the strengths of the two leading providers of ERP software and access and security solutions: **SAP and dormakaba**.

It is paving the way for our customers as they work toward digital transformation.

Time recording, access control and device management

Direct and real-time control from SAP SuccessFactors EC

Best-in-Class solution for SAP users

jay cloud is a “Software as a Service” solution based on the SAP® Cloud Platform. **jay cloud** connects the entire dormakaba product portfolio with SAP SuccessFactors Employee Central, the SAP cloud solution for human resources management.

Access authorizations of employees can be managed directly and in real-time out of SuccessFactors.

jay cloud communicates via the SAP Leonardo IoT Platform with the connected dormakaba time and access devices and provides them with personal master data and authorizations.

The time and access bookings recorded at the terminals are stored in SAP Leonardo and are available for comprehensive evaluations.

Co-Innovated with SAP

The **jay cloud** solution was developed and certified together with SAP as Solutions Extension for SuccessFactors Employee Central and as part of the SAP Co-Innovation Program.

Co-Innovated with SAP®

SAP® Certified
Built on SAP Cloud Platform

dormakaba jay cloud – benefits at a glance

Direct integration into SAP SuccessFactors EC

Access rights are assigned automatically based on the role and function of an employee in the company.

If the role of the employee changes, his access rights are automatically changed.

Based on the SAP Cloud Platform

jay cloud supports your company in the digital transformation.

- SaaS application based on the SAP Cloud Platform
- Meets the highest requirements for IT security
- Your applications are automatically always up to date.

Easy device integration

Convenient connection of devices for access and time management via the SAP-IoT interface.

- Electronic access control
- Data collection and time management.
- Locking and entrance systems
- Identification technologies (RFID, mobile access, biometrics)

User-friendly graphical user interface

jay cloud provides an intuitive, attractive and personalisable web interface.

- It can be used anytime and from anywhere: from a PC, tablet or smartphone.
- Your employees will be happy to work with it.

Worldwide service and sales

We can provide a worldwide service through our partner concept, the cooperation with dormakaba, SAP and SAP consulting houses.

Investment security

SAP is the world's leading manufacturer of ERP software. dormakaba is a leading manufacturer of security solutions.

Both companies stand for innovation, customer orientation and long-term strategies.

Integration of third-party systems - extensions for jay cloud

Jay cloud is an open modular system.

Third-party systems such as visitor management, alarm systems, video management and building information systems can be integrated and orchestrated through the services of the SAP Cloud Platform.

- Visitor management
- Life & Safety
- Video management
- Parking management

- Cantine solutions
- Building management
- Room reservation
- Utilities/remote site access

Benefits for target users

Chief executive officer

- More security, more transparency, lower costs
- International and enterprise-wide solution
- Investment security
- Always current data
- jay cloud as a building block of the SAP digital strategy

HR - department

- All time and access processes can be controlled directly and automatically from SAP SuccessFactors (e.g. in case of onboarding or organizational changes).
- Reduced effort for personnel administration
- No double master data maintenance
- Employee Self Service functions such as replacement of an ID card, authorization requests, time corrections
- Familiar user interface

IT - department

- Full control through a unified system (no system break, no isolated solutions)
- Efficient use of SAP system and infrastructure
- SAP IT Security
- Reduced effort for maintenance, support, training
- Competence and own ability to act in SAP
- Flexible and open for extensions

Any questions?

Please contact us!

Security department
